PRASHANT CHAUBEY

(Eligible to work in Ireland on Stamp 1G)

+353-834065371 | ✉ prashantchaubey9795@gmail.com | Apt. 14, Hildon House, 62 Terenure road east, Dublin 6 |

SKILLS

PROGRAMMING
Proficient:
• Java • Python
Familiar:
• SQL • JavaScript

S.E. TECHNOLOGIES
Proficient:
• Kafka • Dropwizard • Spring • REST
• Memcached
Familiar:
• Hibernate • Django • Flask • CI/CD
• Docker • SQLAlchamy

DATABASES
• PostgreSQL • MySQL • HBase
• Cockroach DB • Mongo DB

EDUCATION

University College Dublin
M.S. Computer Science, 2020
GPA: 4.09/4.2

Jaypee Institute of Information Technology
B.Tech ECE, 2016
GPA: 8.9/10

WORK EXPERIENCE

Soroco India Pvt Ltd | Bangalore, India
Senior Software Engineer, (April 2019 - Aug 2019)
• Designed a Flask web app with REST to enable automated routing and monitoring in datacentres. It worked with Go programs deployed on different servers.
• Developed a machine learning system for a text classification use case. The model was deployed as a Flask service.
• Led a team of four engineers, participated in their roadmap definition, done code-reviews, and established engineering best practices.

Software Engineer, (May 2018 – March 2019)
• Developed an IP, an Electron-based desktop app, which can record certain application interactions and can replay them back.
• Worked on automatic code generation and organization. The above-mentioned app can generate code for recorded processes.
• Designed a scalable distributed system to perform an end-to-end business function on its own for a consumer goods company with an accompanying Django dashboard.
• Attended client meetings and participated in effort estimation and designing sessions with Technical lead.

Wipro Technologies | Greater Noida, India
Java Developer, (Aug 2016 – April 2018)
• Worked on a web app that can perform pre-configured tasks on several registered servers after receiving instructions from GUI.
• Developed a web portal for the Finger-print Verification process during SIM card registration for a telecom operator.
• Designed a desktop app interface for SOAP services and a web app interface for XML-RPC services.
• Built a web portal intended to standardize the project management processes.
• Ensured the desired throughput during high volume system migrations and reconciliation by creating multi-threaded programs.
• Collaborated with remote teams and attended client meetings.

Intern, (Feb 2016 – June 2016)
• Undergone training in Java and Web Development. A final project and periodic assessments were also part of the program.
